SUBJECT: Sampling Results for Property at (b) (6)

Dear (b) (6) :

On June 18, 2012, the United States Environmental Protection Agency (EPA) conducted well water sampling on your property at (b) (6). The purpose of the sampling was to determine whether contamination was present in the well water and to evaluate if any further response actions are necessary to protect public health and the environment.

One investigative sample was collected on the property in June 2012. The well water sample was analyzed for volatile organic compounds.

There were no contaminants detected that exceeded any applicable health-based benchmarks for your property. Laboratory data sheets, which list all of the potential contaminants analyzed for during the sampling, are available upon request. Region 4's website also provides additional information regarding sampling benchmarks and detection levels: www.epa.gov/region4/waste/ots/index.html.

For more information about this site, please see epaossc.org/derringerdrive. For general information about the Superfund program, which cleans up NPL sites, please see www.epa.gov/superfund.

If you have any questions regarding these sample results please do not hesitate to contact myself (contact information below) or Angela Miller, our Community Involvement Coordinator, at 877-718-3752 (toll-free) or directly at (404) 562-8561, or by e-mail at miller.angela@epa.gov.

Sincerely,

A handwritten signature in black ink, reading "Kenneth B. Rhame".
